Textual Questions

Answer these questions

Ques1 Who was Nora? How did she become a friend of the teacher?

Ans: Nora was a five year old child. The teacher visited family of Nora over a weekend. During his stay at Nora's home, the teacher and Nora interacted with each other. Sometimes during the day, Nora came up to the teacher with a book and asked if he would help her to read the book. Soon the teacher and Nora became good friends.

Ques2 How did the teacher observe Nora while learning?

Ans: The teacher observed that the first few pages of the book were easy for Nora. But when she began to meet new words that she did not know, she seemed badly stuck as she was unable to understand those words.

Ques3 What odd thing happened with Nora? Why was the teacher puzzled?

Ans: An odd thing happened with Nora. She misread a word that previously she had read correctly. This had happened a number of times. The teacher felt puzzled and annoyed as the teacher had in his own classroom when the children seemed to forget things they had supposedly learned.

Qno4 Was Nora a careless child? How do you know?

Ans No Nora was not careless. She was a bright student. She was reading the book as well as she could, putting all of her concentration in the book.

Qno5 How should a teacher understand the problems of the children?

Ans To understand the learning problems of a child a teacher must try to see the things as if through his/her eyes. Teacher must give him/her a plenty of time and not be surprised by his/her slowness because for a child, who has only just seen the word for the first time, it is not easy for him/her to understand, but hard.

Qno6 What experience popped into the teacher's mind after Nora's learning problem?

Ans An experience popped into the teacher's mind. Some years before he took a sheet of printing in some Indian language and tried to find the words that occurred most often on the page. At first the page looked like nothing but a jumble of strange shapes. It took him a long time before he could recognize that and picked it out of the others. Often he would go right without noticing it.

Qno7 Why are children of unlettered homes at a disadvantage?

Ans Children of unlettered or illiterate family background homes are at disadvantage when they start learn to read because they lack familiarity with the shapes of words and letters.

Qno8 How did the teacher learn from Nora?

Ans The teacher learnt from Nora that a teacher

(3)

should not be puzzled or annoyed when a student takes time for learning and forget things he/she had supposedly learned. The teacher should understand that learning of a child is a time consuming process. So, the teacher must give him/her a plenty of time and not be surprised or upset by what looks like slowness or stupid behaviour.

#### Lets Write (P.NO 83)

It was a chilly morning and I started for school a little later than my usual time. So I had to hurry up to join other students who had taken some lead. All of a sudden my feet slipped and I fell down. I screamed for help and a very kind man stood before me. He was walking very close to me and stretched his hand towards me in order to help me. With this help I could escape my foot injury and was able to reach the school, though a little late. I am very much thankful to that man who helped me on the way.
